Comprehension:

Read the passage below and answer the questions that follow:

Spirituality plays a significant role in human life by offering individuals a sense of purpose, inner peace and connection to something higher than themselves. As opposed to religion, which often involves specific belief and rituals, spirituality is more personal and introspective. This is true that spirituality propels people to reflect deeper within themselves, cultivate compassion and decipher meaning in their day to day existence. Very often people turn to spirituality in difficult times, finding comfort and strength through meditation, prayer or nature. It has been argued that spirituality promotes mental well-being by reducing stress and nurturing resilience.

Research has suggested that spirituality is helpful in improving emotional health, contributing to a more fulfilling life. People believe spirituality involves exploring questions of life and existence while for others, it is a way to connect with others and contribute meaningfully to the ways of the world. In an increasingly busy world, spirituality can be understood as a way to mindfulness, helping people stay grounded and focus on what really counts.

Comprehension:

Read the following passage and answer the questions.

Artificial intelligence is the technology that drives robotics, driverless vehicles, drones, big data, and other technologies. AI is such an explosive revolution that companies are clamoring to spend billions of dollars of AI-related companies, because they know that AI is the future. It is in every facet of our lives from Siri and Cortana, to predicting diseases such as breast cancer and multiple sclerosis. It is being used to determine who is likely to commit a crime or default on a loan. It will continue to see expanded growth. It is used in every industry and its uses will continue to expand. There will be opportunities and challenges currently unheard of. Libraries will be more involved in AI through STEM (Science, technology, engineering, and maths) careers and collaborations with companies, university departments, workforce agencies, and others. As AI gains in popularity the general public will come to the library to obtain information on AI and what it means for their lives. They will also visit libraries to learn about retraining and other job-related opportunities.

Comprehension:

Read the following passage and answer the questions.

Artificial intelligence is the technology that drives robotics, driverless vehicles, drones, big data, and other technologies. AI is such an explosive revolution that companies are clamoring to spend billions of dollars of AI-related companies, because they know that AI is the future. It is in every facet of our lives from Siri and Cortana, to predicting diseases such a breast cancer and multiple sclerosis. It is being used to determine who is likely to commit a crime or default on a loan. It will continue to see expanded growth. It is used in every industry and its uses will continue to expand. There will be opportunities and challenges currently unheard of. Libraries will be more involved in AI through STEM (Science, technology, engineering, and maths) careers and collaborations with companies, university departments, workforce agencies, and others. As AI gains in popularity the general public will come to the library to obtain information on AI and what it means for their lives. They will also visit libraries to learn about retraining and other job-related opportunities.

Read the following passage and answer the questions.

The library has become to emulate a space of distinction for what a city has to offer to its citizens in a democratic society, or as Manfrendini stated, public libraries epiotomize some of the few remaining genuine democratic spaces. Throughout history libraries have been affected by political shifts, changing power dynamics, growth and disintegration of empires, built up with gusto and enthusiasm, destroyed by wickedness and neglect. Libraries throughout history can be considered incredibly purposeful and anxiously useless, "channel order and chaos, house both print and digital, old and new, they can control and liberate the knowledge they contain". Libraries can be both an instrument to liberate to oppress and a tool for imperial conquest, assimilation and control. Libraries aim to encompass the whole memory of humankind make them vulnerable to complete erasure. Building where collections are housed can also be demolished, re-designed, or eliminated.
